

Welcome to Aviano Elementary School Home of the Eagles and Eagle Pride. We are a learning community that serves approximately 730 students in PSCD (Preschool Services for Children with Disabilities), Sure Start, and Kindergarten to Grade 5.

Aviano Elementary School is a place that has resources to support students and teachers. Some of the service providers on staff include School Psychologist, Speech and Language Pathologists (SLP), English as a Second Language, Host Nation, Multi-age, Reading Recovery, Language Arts and Reading Specialists (LARS), and Learning Impaired Specialists among others.

Students are able to participate in school and after school activities such as the Homework Club, Deployment Club, Chorus, and AYP (Aviano Youth Program).

The success of programs doesn't happen without the collaborative effort of students, teachers, parents, and community members. Participation at school activities, serving as event chairpersons and volunteering for the school are just some of the ways to connect to the school.

The School Advisory Committee (SAC) meets quarterly as a learning body to strengthen the partnership we enjoy with the base command structure. Base representatives and teacher presentations are part of every SAC meeting to make learning about the school and community a priority for further support programs. There's nothing like being a part of a good thing for all students.

The faculty and staff of Aviano Elementary School are committed to providing all students with high quality education through its mission of *Teaching for the Future and Learning for a Lifetime*. We have an Open Door policy where students, parents, and community are welcome to meet with school personnel. The involvement of parents in their child's education is highly encouraged. Volunteer in service for students helps make our school better. We hope you will join us on our quest to improve the quality of educational life for all students. Thank you and welcome!
